Abstract

I began my career as a designer at Raccoon (now Media.Monks Brazil), where I gained knowledge and expertise in the field of UI/UX. At Savvi, I led two squads - graphic design and web development.

Over time, I collaborated on various management processes within the company, particularly those related to process management and recruitment. I became a partner in the company, and under 2 years, we grew from a revenue of 40k to 2MM oh yearly revenue.

Currently, I'm a DevOps Enginner Summer Intern at Eldorado Research Institute.

Professional Experiences

📅 January, 2023 - Now a days 📍 Hybrid

DevOps Engineer Summer Intern
Instituto de Pesquisas Eldorado - (Research Institute)
